

# The Route to Supply Chain Maturity

**START today**

**Qualification:** Digitization simplifies data gathering, speeds the onboarding process for suppliers and buyers, and reduces costs of supplier approval and certification.

**Onboarding:** If you have a mature system, you can use a single set of identity credentials to grant access to all the systems and applications in your stack.

**Managing the Work:** Integrated systems support collaboration to meet your business model and adopt industry best practices.

**Managing the Relationship:** Digital solutions free your organization's staff from constant follow up by providing a central application for suppliers to keep all their information up-to-date.

**REALIZE the VALUE**

**Managing Supplier Information:** Ensure all of your business units get the best rates, know how much you are spend with each supplier, and keep transaction details straight.
